PRICE SENSITIVE NOTICE

This is for information of all concerned that BTA has successfully installed the 4th Extrusion Press, Anodization Plant-2, Substation and other development works as per ROD. We also have built the infrastructures for powder coating plant for the production of most modern, durable powder coated and wooden textured Aluminium profiles to be in market soon. BTA has also installed two new Diesel Generators for uninterrupted power supply to support the increased production capacity. These expansions from Rights share offer fund has almost doubled our rated production capacity. We have also paid off some of the existing outstanding loans as per ROD. Other relevant works as per ROD is in progress.
